Wellness Care Programs

Philosophy Statement: *We treasure the unique family-pet bond by providing comprehensive, high-quality veterinary care with emphasis on exceptional client service and patient care. We promote this level of service by keeping current on medical advances, offering continuing education for our health care team, and being compassionate and understanding towards pets and those who love them.*

- ♥ **Annual and biannual exams** are important for many reasons. Pets age faster than people (each year in a pet's life is 5-8 years of a human's life), pets hide illnesses, and pets cannot talk so they cannot tell you when or where it hurts. Your veterinarian is your pet's doctor, surgeon, dentist, optometrist, and psychologist. (one of each per wellness plan)
- ♥ **Additional outpatient exams and office calls** throughout the year are done at a lower cost as an incentive to come in before problems become severe.
- ♥ **Preventive healthcare including vaccines, deworming, parasite prevention and dentistry** are done at a lower cost as an incentive to keep up with good preventative healthcare for your pet.
- ♥ **Fecal testing** to check for parasites that are in the environment year round. The Center for Disease Control recommends twice yearly fecal testing of pets due to diseases and parasites that can also infect people.
- ♥ **Yearly well-pet blood and urine testing** checking blood cell count levels, kidney, liver, protein, blood sugar and many other levels, helps establish baseline normal values for each individual pet, provides a way of finding decreasing function before it reaches a critical disease state, and helps us uncover and resolve medical problems early, before they cause unnecessary pain, illness and expense. Included tests are listed below under each plan.

X = included in plan

Item	Basic	Bronze	Silver	Gold
Annual & Biannual Exams	X	X	X	X
Dental Disease Screening	X	X	X	X
Intestinal Parasite Exams (2)	X	X	X	X
